

Please do not allow the broadcast flag technology. To do so will destroy TIVO and the like. To take away the time saving ability to record television to view on our schedule except for that which the industry decides isn't worth flagging, is nothing short of draconian to those (millions) of us who have invested in dvr technology. The (forced) transition to digital is going to be a tough sell when the new technology will prohibit what we used to be able to do legally with a vcr.
